Abstract (en)

[origin: WO9801360A1] The invention discloses a device for dispensing in powder form a single dose of a fluid product, characterised in that it comprises: a fluid product reservoir (13) containing a single dose and connected to a pulverising orifice (19); at least one gas cylinder (12) connected to the said pulverising orifice (19), and means (11, 2) for simultaneously emptying the fluid product reservoir (13) and the gas cylinder (12), so as to cause a biphasic pulverisation of the fluid product and the gas at the pulverising orifice.
