Abstract (en)

[origin: DE19860381A1] The invention relates to an oil pickup system for an internal combustion engine, notably a single-cylinder diesel engine, comprising at least three oil pickup tubes (26, 27, 28) which are connected to the oil pump via a suction hose (29) and are arranged in the oil pan (24) in such a way that when the internal combustion engine is positioned at an angle the intake of air is prevented by control valves assigned to the oil pick up tubes.
