Abstract (en)

[origin: EP1059260A2] At the end of filling the bottles are foamed so that the foaming fluid expels air and a first closure part (2) is fitted onto the foam stopper to form a sealing seat on the bottle mouth. The mouth is sealed and sprayed to remove fluid and foam residues. The main closure (4) is then fitted onto the bottle mouth through excluding oxygen Independent claim describes screw closure with inner cap part (2) and outer main part (4).
