Abstract (en)
[origin: EP1059398A1] The joining cross has at least three arms (1,2, 3) projecting at angles from each other in a common foot area and with at least one of the arms having a hollowed area (10) which can be used to form a push-fit connection with another joining cross which can have a corresponding projection. The projection (12) has a suitable cross-sectional shape for fitting with friction engagement in the hollowed area.
