Abstract (en)

[origin: EP1059413A2] The support strip (11) at least on one side in relation to the glass pane (19) is provided with a locking projection (15,16). At least one glass holding strip (21,22) formed like a slotted box profile is elastically lockable by at least one locking projection (15,16). On the inner wall (26) is a holding rib (31) extending in the longitudinal direction of the glass holding strip and engages in a suitable recess (32) of a sealing strip (28,29). The support strip and the glass holding strip are formed as endless extruded profiles. In the at least one glass holding strip is arranged a strip (33) of plaster or plaster cardboard.
