Abstract (en)
[origin: EP1059454A1] The compressor has an axial transport direction from above to below, especially of helical spindle form, cooling channels (12) carrying coolant for its motors (8), bearings (6,7), bearings and sensors (9) and a cooling device for a chamber (3), whose housing (2) has an annular chamber (15) that is partly filled with liquid cooled by the coolant via heat exchanger surfaces (18).
