Abstract (en)

A substantially light-insensitive black and white thermographic recording material comprising a thermosensitive element and a support, the thermosensitive element containing at least one substantially light-insensitive organic silver salt, at least one organic reducing agent therefor in thermal working relationship therewith, a binder, at least one stabilizer and optionally an alpha , omega -alkyldicarboxylic acid with a straight chain alkyl group having at least 4 carbon atoms which may be substituted, however neither including 3,5-dihydroxybenzoic acid as acidic reagent nor di-tert-butyl-p-cresol as a sole organic reducing agent, characterized in that the at least one stabilizer is represented by formula (I): R<1>-(O=C)-R<2>-(C=O)-R<3> wherein R<2> is a divalent straight chain saturated hydrocarbon group with 2 or 3 carbon atoms which may be substituted with one or more of =O, =S, =CR<4>R<5>, an alkyl group, a cycloalkyl group, a hydroxy group, a thiol group, a -(C=O)R<6> group or two of the substituents of R<2> may together form a closed non-aromatic carbocyclic or heterocyclic ring; R<4> and R<5> are independently hydrogen or an alkyl, substituted alkyl, hydroxy, thiol, -(C=O)R<7> group or R<4> and R<5> together may form a closed carbocyclic or heterocyclic group; R<1>, R<3>, R<6> and R<7> are independently a hydroxy or -NHR<8> group or R<1> and R<3> together is an oxygen atom forming an anhydride group; R<8> is hydrogen or a hydroxy, alkyl, aryl or -SO2R<9> group; R<9> is an alkyl, substituted alkyl, cycloalkyl, substituted cycloalkyl, heterocyclic, substituted heterocyclic, aryl, substituted aryl, heteroaryl, substituted heteroaryl, an -OR<10>, or a -NR<11>R<12> group; R<10> and R<11> are independently an alkyl, substituted alkyl, cycloalkyl, substituted cycloalkyl, aryl or substituted aryl group; R<12> is hydrogen or an alkyl, substituted alkyl, cycloalkyl, substituted cycloalkyl, aryl or substituted aryl group; and R<11> and R<12> may together form a closed carbocyclic or heterocyclic group; and wherein the concentration of the at least one stabilizer and the alpha , omega -alkyldicarboxylic acid, if present, is together at least 20 mol % with respect to the organic silver salts; and a recording process therefor.
