Abstract (en)

[origin: WO9945332A1] The invention relates to a plate heat exchanger plate (1) which contains alternative locations (4, 5) for flow openings, the locations of which can be changed to adjust the ridge angle between the ridges of the corrugations (2) of the adjacent plates (1) in a plate heat exchanger composed of plates (1) in order to improve the heat transfer and flow characteristics. The plates (1) may also be provided with a location (6) for a central hole.
