Abstract (en)

[origin: EP1060880A2] The device has a guide unit (2) and a feed triangle (1), which is fixed to one end of the length of paper (3). The feed triangle is releasably connected to the guide unit along the whole of a first side at given fixing points, using hooks and eyes or a zip or slide fastener. The feed triangle may be made of a reinforced textile material, with the fibre running parallel or perpendicular to the hypotenuse of the triangle.
