Abstract (en)
[origin: WO9834838A2] A container, in particular for transporting fruit and vegetables, has a bottom and four side walls that can be folded onto the bottom. The side walls are connected by hinges to the bottom and the hinges are designed as plug-in connecting elements, so that the side walls may be plugged with their hinges arranged at their lower edge into corresponding openings in the bottom of the container and locked therein by locking elements.
