Abstract (en)

[origin: EP1061022A1] This installation has a winding trestle (19), a winding core (4) and two or more winding belt conveyors (5,6) on a belt conveyor magazine. One of the two belt conveyors can be pulled off from a roll (1), so that this belt conveyor strips printed items (3) from the roll. A deflection roller (7) runs the winding belt conveyor that has been pulled off. This belt conveyor takes on a stripping function and prevents the printed items being extricated from remaining stuck on the roll.
