Abstract (en)

[origin: EP1061029A2] The upright (1) has a first height-adjustable, longitudinally movable stop (4) extending vertically to the longitudinal direction and on the table (2) is a second stop (5) extending in the longitudinal direction. The second stop is positionable at different spacings from the table edge located in the longitudinal direction. The first stop has a slot starting from its lower edge and extending vertically to the table surface. The height and width of the slot corresponds to the height of the second stop. The first stop is divided into two parts (4a,4b) by the slot which are movable separately.
