Abstract (en)

[origin: EP1061125A2] Described is a mixture of (i) tricyclic isochroman compounds having the structures: <CHEM> and (ii) di(2-ethyl hexyl) adipate having the structure: <CHEM> with the range of weight ratios of tricyclic isochroman:di(2-ethyl hexyl) adipate being from about 1:1 up to about 3:1 as well as a method for perfuming fabrics using such a composition which comprises washing the fabrics in the presence of a lipase-containing detergent and, optionally, subsequently treating the fabric with a fabric softener. <IMAGE>
