Abstract (en)
[origin: EP1061189A1] The sealing strip (1) for construction and expansion joints between building elements has a cross section which comprises a middle section (4) and two oppositely oriented sections (2, 3) running in the longitudinal direction of the strip. At least one of the sections (2, 3) is provided with facilities (7, 9, 17) for injecting a sealing compound into the joint and its surrounding materials (in particular, concrete).
