Abstract (en)

The invention provides a window (1) comprising a frame with a number of frame members (2) and mounting brackets (7). Each mounting bracket has a first leg (7b) to be connected with the exterior side of a frame member and a second leg (7a) substantially perpendicular to and connected with the first leg in a connection point (7c). The exterior side of the frame members is provided with a longitudinal marking (16) extending in the longitudinal direction of the frame member, and the mounting brackets have at least one marking for cooperating with the longitudinal marking (16) of the frame member. The markings may be made as a graduated scale in the form of a millimetre graduation, a graduation in another unit or a symbol system. <IMAGE>
