Abstract (en)

[origin: EP1380706A1] When installing a window (1) comprising a frame with a number of frame members (2) a plurality of mounting brackets (7) is utilized. Each mounting bracket has a first leg (7b) to be connected with the exterior side of a frame member and a second leg (7a) substantially perpendicular to and connected with the first leg in a connection point (7c). The exterior side of the frame members is provided with a longitudinal marking (16) extending in the longitudinal direction of the frame member, and the mounting brackets have at least one marking for co-operating with the longitudinal marking (16) of the frame member. The markings of the mounting bracket are formed as a graduated scale in the form of a millimetre graduation, a graduation in another unit or a symbol system. The mounting bracket is positioned with the scale value in flush with the marking of the frame member. <IMAGE>
