Abstract (en)
The mortar syringe (10) has a tube (12) with a smooth inner surface and a nozzle (14) at one end. A piston (18) slides freely in the tube and is controlled by a piston rod (30), whose free end has a handle (34). The end of the tube opposite the nozzle has a removable closure cap (38) with a pressure balancing opening and an opening through which the piston rod passes. The cap may be closed by screwing, by a bayonet closure or by a clamp device. An Independent claim is included for a method to apply mortar using the mortar syringe.

Abstract (de)
Eine Mörtelspritze (10) besteht aus einem Rohr (12) mit glatter Innenfläche, einer an einem Ende des Rohrs (10) angebrachten Düse (14) und einem im Inneren des Rohrs (12) frei verschiebbaren Kolben (18). Dieser ist an einer in das Rohr (10) hineinragenden Kolbenstange (20) angebracht. Deren freies Ende ist mit einem Griff (34) versehen. <IMAGE>
