Abstract (en)

[origin: EP1061228A2] The profile is made of a thin-walled stainless or chromium steel plate with a wall thickness less than 0.5 mm, but preferably between 0.09 mm and 0.25 mm. The profile is preferably formed as a polygonal closed hollow profile, to improve its resistance to torsion. Longitudinal or transverse ribs or flanges may be formed in the profile, to improve stiffness. Independent claims are included for a window or door or for a glazed panel with the profile.
