Abstract (en)
[origin: EP1061577A2] A high frequency multi-layered circuit component (11), comprising a plurality of layers (12-14) laminated to each other; an active element mounted on one of the plurality of layers; at least one passive element formed within the plurality of layers (12-14); a high frequency circuit constituted by at least part of the at least one passive element; a power supply line (15) for supplying direct-current power to the active element disposed along one of the plurality of layers (12-14); high frequency hot-lines included in the high frequency multi-layer circuit component (11) and disposed along one or more of the plurality of layers (12-14) which are different from the one of the plurality of layers (12-14) along which the power supply line (15) is disposed; and a ground layer (16, 17) forming capacitance with the power supply line (15) and disposed between the power supply line (15) and the high frequency hot-lines. <IMAGE>
