Abstract (en)
[origin: WO9947063A1] The invention concerns a cleaner (3) arranged upstream of a sorting station (1), having an outlet (8) open inside a closed chamber (9) whereof the air is conditioned and wherein the bag type objects are displaced towards a dryer (10). The conditioning station (13), downstream of the dryer is also located in the closed chamber, thereby limiting the particular contamination generated by the ambient air. The invention is useful for treating disposable gloves for white rooms.
