Abstract (en)

[origin: WO9943777A1] The invention relates to fabric conditioning concentrate compositions comprising a fabric softening compounds mixed with oil. In use, the fabric softening concentrate is diluted with water. In order to improve the viscosity, stability and fabric softening quality provided by the emulsion, a water-soluble polymeric structurant is used. The water-soluble polymeric structurant can be suspended in the conditioning concentrate itself or it can be first of all dissolved to the final desired concentration in the water used to dilute the fabric softening concentrate.
