Abstract (en)

[origin: WO9948218A1] A power line carrier communication device has a high speed modem incorporated or embedded into a base unit (102) of the device to minimize degradation in modem data transfer speed of signal degradation. The apparatus functions in combination with a power line carrier extension unit (107) which while communicating with a user's electronic equipment (110) provides for communicating information to and from electronic equipment (110) over standard telephone lines, via standard AC power lines (105).
