Abstract (en)

[origin: EP1063174A1] A package is a hermetically sealed pocket formed from two structures. The first structure has a support layer, an adhesive layer and a sealable internal layer. The second structure has a sealable layer or is similar to the first structure. An opening in the package is formed by two zones between the two sealable layers. The first zone is a breakable coating and the second zone is resealable. An Independent claim is included for manufacturing a package as above.
