Abstract (en)
[origin: EP1063379A2] The hinge has a housing part (1) on which a cover part (4) is preferably rotatably located. A securing part (18) is provided on the housing part or cover part, so that the relation position of both parts is fixed. A tension spring (8) is provided on one of the two parts. The securing part is made of plastics and is inserted in a square stamped-out aperture (19) in the housing or the cover part.
