Abstract (en)
[origin: EP1063403A2] The load adjuster incorporates an emergency spring (17) of elastic plastic. It is positioned between the adjusting shaft (2) and a lever (13), which is moved a return spring (12) against a stop (15) defining an emergency running position. The emergency spring is ring-shaped and engages around the adjusting shaft. The lever has a sleeve (16) located concentrically around the shaft. Lever and sleeve are a one-piece modular part of plastic.
