Abstract (en)
[origin: EP1063665A2] The switch device has at least one terminal clamp for connecting electric wires or flex conductors. The clamp is a connector clamp (10). The conductor (40) can be connected to the clamp at one point. A terminal element (39) of the switch device can be connected to the clamp at another point. The clamp can be secured in place by a lock etc. so that it cannot be pulled out.
