Abstract (en)
[origin: WO9947216A1] The present invention provides a data, especially golf score data, collection system including: an electronic central data collection means for accumulating, storing and manipulating data; a plurality of data input means for entering data remotely; and communications means for communicating between the data input means and the data collection means, whereby data may be entered by a person into any of the data input means and wherein data so entered is transmitted to the data collection means. The invention also provides a method for golf scoring including the steps of: entering a score remotely into a score input terminal; transmitting the score from the terminal to a central score collection computer for accumulating, storing and manipulating golf scores; and storing the score on the central computer.
