Abstract (en)

[origin: WO9947222A1] A toy building element (1) comprising a central portion (2) provided with at least one coupling means (3, 4) arranged axially relative to the central portion (2). Furthermore, the toy building element comprises at least one other coupling means (5, 6) arranged radially relative to the central portion (2), the at least one further coupling means (5, 6) being so arranged that it is able to rotate in excess of 360 DEG about the central portion (2).
