Abstract (en)

[origin: WO0043161A1] The invention relates to a method for machining plane surfaces of a disk brake (1) for motor vehicles. According to the invention, a wheel bearing unit consisting of a wheel hub (2), a roller arrangement (3) and an external bearing ring (4) is fixed on a workpiece support (6) with the vehicle side mounting surface (5) of the bearing ring (4) and the wheel hub (2) of the wheel bearing unit is driven in rotation. A flange surface (1) which is provided on the wheel hub (2) for a brake disk or the braking surfaces of a disk brake which is mounted on the flange surface is/are machined.
