Abstract (en)

[origin: WO9947984A1] The invention relates to a new actuation or adjustment member, especially a crown or press button, designed for a watch, especially a wristwatch. Said member comprises a stem (2), an actuation head (2') provided at one end of said stem (2), as well as means for guiding the stem (2) in a sealed manner across a wall (4) of the watch case (3) by means of at least one sealing ring (10-12) concentrically surrounding the axis of the stem (2).
