Abstract (en)
A cap (1) has a plurality of main elements (5), the side of which are connected to one another, each of the main elements (5) being in the shape of an approximately isosceles triangle having no top portion or an approximately sector having no top portion. A top element (6) in the shape of a dome or a flat and poygon or the like is connected to said main elements (5). The cap (1) has two recesses or concave portions formed at lower portions of the main elements (5). At least one adhesive tape (8) is attached on the outer surface of a lower portion of at least one of the main elements (5), an adhesive surface being formed on the outer surface of the adhesive tape (8). At least a portion of the top element (6) and the main elements (5) is made from a mesh. The cap (1) has a brim (10) formed on the front of the lower portion of said main elements (5) and an awning (11) formed on the back side of the lower portion of the main elements (5). <IMAGE>
