Abstract (en)

[origin: EP1065153A1] The film packaging comprises a tubular foil bag (12) with circumferential wall (14) and two side ends (16) and a cover (22) fixed to one of these ends. The cover has an end face (24) with opening (32) for letting the paste out of the bag and a sealing element (52) adjoining a socket head (36) which can be fitted onto the end (16) of the bag supporting the cover part. The sealing element is set on the circumferential surface (26) and/or in the transition area (30) from the end face to the circumferential face of the cover. The sealing element is a sealing ring fitting into a socket groove (53) provided for same on the cover part (22). The sealing element can be a spring elastic sealing lip.
