Abstract (en)

The current invention corresponds to a coupling device between a wall opening and a cover element, wherein the coupling device has a first coupling element (1) connected to said wall opening and a second coupling element (2) connected to said cover element, and an axle (3) mounted in holes (11) in said coupling elements (1, 2) to connect said two coupling element (1, 2). The axle (3) comprises a mortise lock (5). <IMAGE>
