Abstract (en)
[origin: EP1065342A2] The glass pane (3) surrounded by the wooden or metal door frame (1) is fixed to the frame. At least two parallel glass panes are spaced apart by at least one spacer piece (5) in the form of strips to form at least one double-glazed panel. The outer sides of the glass panes lead into the outer sides of the door frame. The glass panes are stuck to the spacer piece by use of a double sided adhesive strip (7). The spacer strips are screwed to the door frame from the end side facing the space between (11) the glass panes.
