Abstract (en)
[origin: WO9942255A1] The invention relates to a vending and storage device (1) for tools, comprising a support device for tools having a cylindrical shaft with differing sizes and arranged in rows in locating slots (8). An elongated precision measuring channel (3a, 3b, 3c) is allocated and arranged parallel to said slots (8). A measuring gage (5) formed by stop bodies (6,2) is allocated to each locating slot (8) in or on the precision measuring channel (3a, 3b, 3c). Several precision measuring channels (3a, 3b, 3c) are arranged in a substantially parallel manner in the support device. Said channels lead to a rough measuring channel (4) with measuring gages (5) extending along the front face of the precision measuring channels (3a, 3b, 3c) at a right angle therefrom. Several locating slots (8a, 8b, 8c) for tools having the same diameter are allocated to at least the precision measuring channels (3a, 3b, 3c).
