Abstract (en)
[origin: WO9949011A1] The invention provides for a process for the production of a fermentable wort comprising the steps of: liquefying and saccharifying cereal material in the presence of one or more mashing enzymes, optionally subjecting the so-treated cereal material to filtration to obtain a fermentable wort, characterized in that during liquefaction and/or saccharification an enzyme having lipolytic activity is present. The cereal material may comprise crude cereal material, such as crude barley.
