Abstract (en)  
The invention relates to a mail sorting system and a method for handling mail matter, comprising a set of sorting compartments (1) consisting of one or more sorting compartments (2), an indicating means (11) arranged in each compartment (2) indicating the compartment, a control device (12) controlling the indicating means (11). The invention is characterized in that the mail sorting system and method are intended for sorting unaddressed mail matter in which address data is not readable on a mail piece, whereby the sorting data is arranged in the control means (12), and the mail sorting system and method are intended for collecting pre-sorted bundles (3) of mail matter according to delivery order from the compartments (2) of the set of sorting compartments (1), whereby the mail collecting order is arranged in the control device (12). <IMAGE>
