Abstract (en)
In a driving device for an elevator, a waterproof motor main body is employed. A traction sheave and a brake device are respectively covered with separate waterproof covers, in other words, a waterproof cover for a sheave and a waterproof cover for a brake. The frame of the motor main body is left exposed in the hoistway. Further, a leading-out part of a rope for leading-out from the waterproof cover for the sheave is surrounded by a tubular waterproof cover. <IMAGE>
