Abstract (en)

[origin: EP1067331A2] The system has at least one low voltage current rail (1) with two parallel strip-shaped conducting outer surfaces and at least one insulating layer between them and an adapter unit (3) for connecting and/or holding one or more lights. A holding arrangement and holding elements are designed so that the holding arrangement is applied around the rail and holding elements to hold the elements pressed together. An Independent claim is also included for an adapter unit.
