Abstract (en)
[origin: EP1067633A2] The connector has at least one contact (2) with a contact region for connection to a complementary contact and a connecting region for connection to a coaxial cable (30), whereby the contacts have peripheral grooves (31), a securing sleeve (111) with a latching arm that engages the groove and a housing with a complementary latching element for holding the latching arm in the latched position.
