Abstract (en)

[origin: DE19904182A1] The invention relates to a device for cutting lines of material lengthways, comprising a cutter bar (1) which is oriented crosswise to the direction in which the line of material passes through and which is provided with a guide (7; 46) whereon the knife holders (2) are supported in such a way they can be displaced and blocked. The device also has a guideway (9) which is allocated to the cutter bar (1). A device (10) for positioning individual knife holders (2) on the cutter bar (1) is moveably guided on said guideway (9), said positioning device also being connected to a drive mechanism and having a tong-type gripper (12) which can be engaged with the respective knife holder (2) to be positioned.
