Abstract (en)

[origin: WO0009323A1] The invention relates to a multilayer protective film (100) consisting of a base film (1) made of a plastic material and a wear-resistant layer (2) which comprises at least one adhesive peel-off film (2.1, ..., 2.n) made of a plastic material, an adhesive layer (3.1, ..., 3.n) being arranged between the base film and the wear-resistant layer. In at least one force-application area (10) situated along an edge the multilayer protective film can be manually separated and at least one upper peel-off film (2.n) of the wear-resistant layer can be peeled off such that the adhesive layer conferring the adhesive properties is fully removed at the same time.
