Abstract (en)  
[origin: EP1068828A1] The filter bag (8) has a cardboard mounting plate (16), to which a dust bag (37) is secured by adhesive, with a sealable opening (19) for insertion of the vacuum cleaner suction hose. The closure (V) for this opening is displaced linearly between two superimposed layers (38, 40) of the mounting plate and is fully received within the outer contour of the mounting plate in both the open and closed positions. Pref., the closure plate is accessible via a slot (57) formed in the uppermost of the superimposed layers in the open position, to allow its manual displacement into the closed position.
