Abstract (en)
A cleaning system for washing machines has a nozzle arrangement (2) with at least two passage openings for at least one cleaning medium (9). The openings generate jets impinging on one another. The opening is designed as a nozzle influencing the jet. The nozzle arrangement is designed as a concave, convex or plane nozzle body (3). The nozzle arrangement is designed as a re-entrant nozzle body which projects into the inner chamber of a region guiding the cleaning medium. The jet generated by several nozzles (12) is formed inside the inner chamber or funnel region of the nozzle body.

Abstract (de)
Die Erfindung betrifft ein Reinigungssystem für Spülmaschinen. Hierbei weist das Reinigungssystem (1) eine Düsenanordnung (2) mit wenigstens zwei Durchtrittsöffnungen (10, 11) für mindestens ein Reinigungsmedium (9) auf, wobei die Durchtrittsöffnungen (10, 11) aufeinandertreffende Strahlen (19a, 20a) erzeugen. <IMAGE>
