Abstract (en)

[origin: EP1069020A1] The tension coupling for a rail vehicle has a tension rod (11) and a fork head (3) for connection with a hooked tension arm (1), the end of the tension rod adjacent the rail vehicle provided with a pressure plate (8), with a spring element (6) positioned coaxial to tension rod acting between the pressure plate and a stop (5). The tension rod and the fork head are provided as 2 separate parts, with a screw thread (14a) at the end section of the tension rod.
