Abstract (en)

[origin: FR2794141A1] A mechanism for forming a selvage has an electric motor coupled by a flexible transmission to two frames so the frames are driven in opposite directions in a vertical plane. An Independent claim is included for the following: (a) A weaving plant includes the above fulling mechanism Preferred Features: The frames slide within a casing. The flexible drive includes two notched belts coupled to the upper and lower edges of the frames to form an endless assembly. Each belts passes around a notched pulley.
