Abstract (en)
[origin: EP1069258A2] The flooring screed rail consists of a separating strip (7) possessing an L shaped sectioned reinforcement element (8). At least two spaced apart foot-parts (1) possessing upward protruding arms (3) which have recesses (5) and protuberances (6) extending inwards across the foot part's lengthwise axis (4) and positioned above each other with ridged surface. The outward protruding part (10) of the bottom end of the reinforcement element fits into a profiled recess in an arm.
