Abstract (en)  
[origin: EP1069264A1] Lock has housing (1) with bolt (3), and system for controlling bolt displacement (5). Bolt is placed in opening (13) with lateral clearances so as to slide with no friction between retracted and exit positions. Control system has one-way engine powered by battery, and electronic part including data entry and display. Engine is attached to bolt through circular cam (25) and driving lever (27).
