Abstract (en)

[origin: EP1069378A1] The appliance door has at least one glass or glass-like pane (2) and at least one support element (5,6). Between the support element and the pane is at least one spacer piece (55,65). Each spacer piece is at least partly deformable, preferably elastically deformable. At least the surface facing the pane is made of gliding material, such as silicon or rubber.
