Abstract (en)

A pressure-sensitive adhesive sheet comprising a plastic sheet (1) having on one surface thereof a pressure-sensitive adhesive layer (3), wherein the plastic sheet (1) has on at least one surface thereof a print layer (2) having a thickness of 40 to 1,000 μm and containing 30 to 90% by weight based on the total weight of the print layer (2) of an X-ray absorbing metal. The print pattern may be scales, grid lines, numbers, etc. singly or in combination. Information on individual subject or scales or grid lines pattern may be copied in a radiograph having an image of the inside of the subject body. This enables surgeons to determine the size of the inside of the subject body or position of target organ with ease. <IMAGE>
